EDUCATION

California Polytechnic State University

San Luis Obispo, CA

Bachelor of Science in Computer Science — GPA: 3.8/4.0

Sep. 2022 – Jun. 2026

WORK EXPERIENCE

CampusIRL

Jan. 2025 – Present

Founder & Lead Engineer

San Luis Obispo, CA

- Built a geospatial platform in **React Native** and **TypeScript** featuring real-time social threads, sublease listings, and local business deals as distinct marker types on a unified map, scaling to **500+ active users**.
- Stopped **\$1000+** in SMS toll fraud by deploying **Firebase App Check**, rate-limiting, and granular **Firestore security rules**.
- Designed the backend rideshare booking system using **Firestore ACID** transactions to manage seat applications and driver approvals, preventing duplicate ride reservations under concurrent requests.
- Led grassroots B2B outreach, securing exclusive partnership deals with **5 local businesses**.

Yuansheng Refurbisher

Sep. 2025 – Dec. 2025

Co-Founder

Los Angeles, CA

- Engineered the core bypass mechanism for locked Chromebooks by physically interfacing with motherboard **EEPROM chips** using **SPI hardware flashers** and **Python** automation, refurbishing **2,000+ units**.
- Secured a **\$50,000 Newegg distribution deal** by scaling a hardware refurbishing pipeline that enabled full Ubuntu/Windows OS migrations via custom **UEFI payloads**.

Livin

Jan. 2025 – Aug. 2025

Development Tech Lead

San Luis Obispo, CA

- Directed an Agile team to build a **React Native** housing app for **300+ users**, integrating a Hinge-style roommate-matching system and sublease listings; used **Expo** and **GitHub Actions** for CI/CD, delivering a platform that lets users find compatible roommates and available subleases in minutes
- Designed scalable backend feed retrieval using cursor-based pagination and **Firestore** composite indexes to reduce database reads for image-heavy discovery feeds.

Cal Poly CSSE Department

Jun. 2024 – Sep. 2025

Mobile Application Team Lead

San Luis Obispo, CA

- Engineered an **offline-first** architecture for Search and Rescue using **SQLite** local caching and a store-and-forward sync, preserving collected data in zero-connectivity environments.
- Developed a weather-tracking component in **React Native** using gesture handlers, **TypeScript**, and **Zod**, bypassing third-party limitations and maintaining smooth UI performance without blocking the JS thread.

Hack4Impact

Oct. 2023 – Aug. 2025

Tech Lead

San Luis Obispo, CA

- Directed a **12-person cross-functional team** to build and launch two **Next.js/TypeScript** full-stack event registration web apps serving **500+ volunteers** and processing **1000+ registrations**.
- Engineered a custom digital signature pipeline, utilizing dynamic PDF parsing to inject React Canvas inputs into legal waivers and securely syncing the generated artifacts across **AWS S3** and **MongoDB**.
- Engineered a distributed **two-phase deletion pipeline** across **Clerk**, **MongoDB**, and **AWS S3**, supporting secure account teardown and reducing orphaned cloud storage costs.

Sparkli AI

Jun. 2023 – Aug. 2023

Software Engineering Intern (AI/Full-Stack)

Palo Alto, CA

- Built an AI application with **TypeScript**, **React**, **MongoDB**, **LangChain**, and **GPT-4** that transformed student questions into age-appropriate interactive stories, serving **100+ students**.
- Automated storybook illustrations by sending **GPT-4** text to **DALL-E** and Stable Diffusion APIs via **Python** scripts, eliminating manual rendering and delivering visual assets in real-time.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, SQL, C, C++, HTML/CSS

Frameworks/Libraries: React Native, React, Next.js, Node.js, Express, Expo, LangChain, Pandas, Scikit-learn, Zod

Cloud/Tools: Docker, AWS (S3, IAM), Firebase, MongoDB, GitHub Actions, Vercel, Git, Clerk, Postman
